User Audit Detail Report

User Trend Comparison Chart

- Easily spot spikes in bandwidth use and Web visits in trend charts.
- View time spent online and compare trends by date range.
- Easily drill down to more detailed forensic data with interactive reporting.
- Schedule reports to run on your timetable.

Top Users Visit Chart

Technical Advantages

- **Built-In Syslog Server.** Directly connect syslog-enabled devices.
- **Bandwidth Protection.** Monitor Web sites that consume the most bandwidth.
- **Security Assurance.** Identify spyware, malware, public proxies, etc.
- **Active Directory Support.** Seamlessly integrate with Active Directory.
- **Automatic List Updates.** Stay on top of the latest Web 2.0 trends.
- **Minimal-Effort Administration.** Administer through the browser with ease.
- **Array Support.** Manage multi-location configurations from one server.
- **Scalability.** Handle small to large amounts of data as your company grows.
- **Adaptability.** Support log file formats regardless of proxy server or firewall.

Minimum System Requirements

- **Processor:** 2 GHz
- **Memory:** 4 GB RAM
- **Hard Disk:** 500 MB free disk space depending on log file storage needs
- **Supported Operating Systems:** Windows Server 2016/2012/2008/2003, Windows 10/8/7, Linux: Red Hat, Fedora, CentOS, and Ubuntu, Chrome OS 57

Note: See [Cyfin System Requirements](#) for more details on the best platform for your environment.

Log File Support

Cyfin supports virtually all commonly used log file formats. Examples include those generated by proxy servers, firewalls, and gateway devices, such as IronPort, Palo Alto Firewall, SonicWall, WatchGuard, and Squid Proxy. Our built-in syslog server can manage the syslog data from your syslog-enabled devices.

Installation and Evaluation Support

When needed, Wavecrest provides consultation and advice via telephone, live chat, or e-mail at no charge during the free trial period as well as with a current license. Technical Support via WebEx (remote support) is also available.

Pricing

Cyfin is a subscription-based software product that offers the industry's best value for employee Web-use monitoring and reporting. Pricing is tiered, based on the number of people ("nonconcurrent users") to be monitored. In general, the price-per-user decreases as the number of users goes up. Every Cyfin purchase includes:

- No-charge, U.S.-based technical support for the lifetime of your license
- Continuous URL List updates
- Free product upgrades
- 30-day money-back guarantee

Discount pricing is available for government agencies, educational institutions, nonprofit organizations, and resellers. For more information, contact Sales at 321-953-5351, Ext. 3.

Wavecrest has over 20 years of proven history of providing reliable, accurate Web-use management and Advanced Log File Analyzer products across various industries. Managed Service Providers, IT Specialists, HR professionals, Forensics Investigators, and business managers trust Wavecrest's Cyfin and CyBlock products to manage the human factor in business Internet usage—managing cloud services, reducing liability risks, improving productivity, saving bandwidth, and controlling costs. Wavecrest is trusted by large government and commercial organizations such as US-CERT Homeland Security, U.S. Department of Justice, USPS Office of Inspector General, National Grid, Johns Hopkins, and a growing list of global enterprises and government agencies. We are a proud long-term GSA contract holder. For more information on the company, products, and partners, visit <https://www.wavecrest.net>.
